## DETAILED ACTION

### *Status of the Claims*

Claims 54, 57, 66 and 69, are pending in the instant application, and are the subject of the Office Action below.

### *Previous Rejections Withdrawn in view of Applicants' Amendment*

In view of Applicants' amendments to the claims, the previous rejections under 35 USC § 112, second paragraph, and 35 USC § 103(a), are withdrawn.

### *New Grounds of Rejection*

#### *Claim Rejections - 35 USC § 112*

The following is a quotation of the second paragraph of 35 U.S.C. § 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 54, 57, 66 and 69, are rejected under 35 U.S.C. § 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claims are indefinite for reciting the phrase "the ligand ...is selected from the group consisting of the peptide whose amino acid sequence *is* set forth as" because the metes and bounds of the claim are not clearly defined. For example, there is ambiguity by Applicants' use of the term "is" to capture the claimed amino acid sequence because it is not clear if the claim language is intended to be open or closed. Applicants could overcome this rejection by amending the claims to recite, for example, the phrase "wherein the ligand expressed on the surface of the virus comprises a peptide comprising the amino acid sequence selected from the group consisting of SEQ ID NO: 2 and SEQ ID NO:3."

Claims 66 and 69 are indefinite for reciting the term "the virus" because there is insufficient antecedent basis. Replacement with the term "the bacteriophage" would overcome this rejection.

***Conclusions***

No claim is allowable.

If Applicants should amend the claims, a complete and responsive reply will clearly identify where support can be found in the disclosure for each amendment. Applicants should point to the page and line numbers of the application corresponding to each amendment, and provide any statements that might help to identify support for the claimed invention (*e.g.*, if the amendment is not supported *in ipso verbis*, clarification on the record may be helpful). Should Applicants present new claims, Applicants should clearly identify where support can be found in the disclosure.
